A-903, Shivalay Height, Stadium Road, Motera, Sabarmati, Ahmedabad  
Ph: 98254 34 784 (M), Email: sanjay\_tamboli@yahoo.com, [sanjay.tamboli@gmail.com](mailto:sanjay.tamboli@gmail.com).

## IT PROFESSIONAL

**OBJECTIVE:** Seeking a challenging position in the Information Technology Sector which would provide with opportunities for professional growth, where I can utilize and enhance my experience & acquired technical skills.

## SUMMARY OF SKILLS

Technically astute, result driven and accomplished software professional with 31+ years of brilliant experience successfully delivering on project of various sizes, in multiple domains viz. Banking, Finance, Inventory, Govt Administration, Sales & Marketing and Advertising to diverse range of clients. Last I worked as a **Senior Project Manager with Nascent Info Technologies Pvt. Ltd, Ahmedabad.**

### EXPERTISE IN:

- Managing and delivering multiple mobile and web based projects in Java, Microsoft technology and PHP using MS SQL server, Oracle, MySQL and PostGre database.
- Client interaction for system study, mapping system requirement, conducting system analysis and design for very large ERP for e-governance and banking projects.
- Huge ERP e-governance and banking project planning / execution, resource allocation / management, task allocation to team members, team supervision / guidance and performance and product reviews to deliver quality project in time.
- Functional specifications and database design ERP e-governance and banking project of large scale.
- System Design specification, functional testing, system delivery / implementation, walk through and user training for large ERP e-governance and banking project.
- Managing project configuration, software and database installation / up gradation.
- Coordinating with all concerned department like client functional team, web design, technical writer, support team during various stage of project.
- Played a role of **Management Representative (MR)** to get the ISO 9001:2008 certificate for Info Stretch Solution Pvt Ltd which includes functions like marketing, software product development, customized software development, software configuration service, quality assurance and quality control, System administration and purchase.
- Participate in employee recruitment process in consultation with HR dept and pre-sale process in consultation with marketing department to define the tentative scope and time estimation for the project.
- Setting pre-sale and post-sale process, which takes care of all the activity during sales and project execution
- Implement new process and improve existing process continuously
- Finalize specification and open source for company product
- Good exposure to ecommerce

I have Sound knowledge of SDLC and software development best practices and the ability to excel within a challenging environment, initiating and executing across a portfolio of projects harmonizing technical needs with business realities. Demonstrated Project Management skills with extensive exposure to broad range of team management activities thrive on working in challenging environment. Planning & co-ordination of all aspects of the project, reviewing project specifications, resource and capacity planning, ensuring a high level of customer support and on-time delivery performance. Strong Leadership to provide direction, motivation and fostering a culture that has high standards of ethics & professionalism.
