PERSONAL PROJECTS

Redevelopment & Enhancement of cctvsecuritypros.com website (01/2020 - 03/2020)

- Customized website using Theme File editor,Page Builder and locally by Stencil CLI. Modified a page's Java script calling of remote API using stencil utils library.
- Database: Bigcommerce.
- Tools:Sblime Text Editor, CSS3 and HTML5.
- Web Technology: Java Script, PHP, Jquery, Bigcommerce.

Worked as java intern at S3P Technology (03/2017 - 07/2019)

- Employee Information System, a browser based application where a valid employee can register his details and can check whether the user name is already present in the database or not. If the user registered successfully it is back to the index page and login as an existing user through servlet chaining.
- The application contains three servlet pages. The data are passed and retrieve through session attribute among the different servlet and html pages.
- Used NetBeans IDE for coding whole application. Design the user interface pages using HTML and CSS. Developed server side programming using JAVA servlets. Responsible for client side validation using JAVASCRIPT. Developed java classes to update,retrieval and inserting records to Oracle Database.
