NEHA HUMBAL

IT Engineer

Phone: 8141812162
Email: neha.humbal5340@gmail.com

Objective

An energetic and adaptable engineer with combined in-depth Technical, Management knowledge, and practical experience as an IT Engineer, looking for a challenging opportunity to learn, share my knowledge and skills, and gain experience.

Experience

Position:-Odoo Developer
Company:-TeqStars Technologies (Rajkot)

Odoo is an open ERP and work for business management. So for that we have to make changes in frontend and backend sides as per the client requirements.

I also have contributed in these requirements which are as bellow:-
- In the front side I had to add different types of fields using python and XML files.
- Also modified views by inheriting xml files. Created a product which displayed on the web page.
- Modified reports and barcode by inheriting view files.
- In the backend side I worked with the API.
- Have done migration.
- Used to do testing (debugging) to understand the flow of the program and find errors from the program.
- Have the better understanding of overriding and inheriting the method.
- Made an application school management and successfully install in odoo database. For that I have to work on xml (view files), python files, and security files and manifest file.

Formal Education
